Anti-Fingerprint Finish

Conventional interior frontals and furniture tops have to be cleaned constantly to rid them of fingermarks. This is no longer necessary with the new Invisible Touch HPL.

No matter how many hands touch the surface, no matter how many times the laminate is exposed to scratches, any traces or marks will not be visible.

The special overlay film with a highly functional anti-fingerprint coating is responsible for the great optics, haptics and functionality of the HPL. The surface has a premium look thanks to its velvety matt finish, low light reflectivity and a pleasant soft to the touch feel.
